

As an Indiana Citizen, I want to speak out against proceeding with 02-278. I am an advocate of the Do Not Call law and do not want it to be diminished by a possible preemption because one group (banks) wants the ability to contact current and potential customers. It is certain that if they are given access to my personal information, others will follow. If this is allowed, this U.S. citizen will remove all my family's assets from any/all financial institutions, and will cease to remove our telephone land line causing further financial burden to those who refuse to accept that consumers have a right to their privacy. It is my hope that the FCC has fully explored the repercussions that will incur if they preempt the Do Not Call law to accommodate commercialism and neglect the constituents who are responsible for putting many into office.
